# Business Requirements Document (BRD) Template · Expert version

A business requirements document template helps you capture what the business needs from a project, why, and how you will know it is met, so the solution is built to the right requirements first time.

## How to use this template

1. Complete the overview: objectives, scope and stakeholders.
2. Run workshops and interviews to gather requirements.
3. Write each requirement as a clear, testable statement with a rationale and source.
4. Prioritise with MoSCoW and add acceptance criteria.
5. Review with stakeholders and get sign-off before design starts.

## Tips

- Describe what is needed, not how to build it.
- One requirement per row.
- Trace every requirement to an objective.
- Control changes through change requests.

## Dashboard (sample data)

| Field | Value | Count |
|---|---|---|
| Type | Functional | 2 |
| Type | Non-functional | 1 |
| Type | Constraint | 1 |
| Type | Data | 0 |
| Type | Reporting | 0 |
| Priority (MoSCoW) | Must | 3 |
| Priority (MoSCoW) | Should | 1 |
| Priority (MoSCoW) | Could | 0 |
| Priority (MoSCoW) | Won't | 0 |
| Status | Draft | 1 |
| Status | In review | 0 |
| Status | Approved | 3 |
| Status | Rejected | 0 |
| Status | Deferred | 0 |

## BRD overview · Business requirements document (BRD)

| Section | Guidance | Your content |
|---|---|---|
| Project name and owner | | |
| Executive summary | The need and the proposed outcome in brief. | |
| Business objectives | Measurable goals the project supports. | |
| Background / current state | How things work today and the problems. | |
| Scope | In scope and out of scope. | |
| Stakeholders | Who is affected and who approves. | |
| Assumptions and constraints | | |
| Requirements | See Requirements tab. | |
| Success measures | How you will judge success. | |
| Sign-off | Names, roles and dates. | |
| | | |
| | | |

## Requirements · Each requirement is testable and traceable

| ID | Requirement | Type | Rationale | Priority (MoSCoW) | Source | Acceptance criteria | Status |
|---|---|---|---|---|---|---|---|
| BR-01 | Customers must be able to reset their password without contacting support | Functional | Reduce support calls | Must | Support data | Reset completed in under 2 minutes | Approved |
| BR-02 | The portal must show the last 24 months of invoices | Functional | Customer requests | Must | Customer survey | All invoices since 2024 visible | Approved |
| BR-03 | Pages must load in under 2 seconds | Non-functional | User experience | Should | UX research | 95th percentile under 2 s | Draft |
| BR-04 | Data must be stored in the EU | Constraint | GDPR policy | Must | Legal | Hosting region confirmed | Approved |
