Content Calendar Template · Expert version

A content calendar template plans what you will publish, where and when, across your blog, social media and email, with owners and status so nothing slips and every post supports your goals.

How to use this template

1. Set goals and the channels you will use.
2. Plan themes or campaigns for the month or quarter.
3. Add each piece with a publish date, channel, topic, owner and status.
4. Use the target keyword column for SEO content.
5. Review weekly and record links once published.

Tips

- Batch similar content to save time.
- Mix formats: guides, short posts, video.
- Leave gaps for timely content.
- Repurpose one big piece across channels.
