# User Story Template · Advanced version

A user story template helps you write requirements from the user's point of view, 'As a… I want… so that…', with clear acceptance criteria, so teams build what users actually need.

## User stories · Write stories that are Independent, Negotiable, Valuable, Estimable, Small and Testable (INVEST)

| ID | Epic | As a… | I want… | So that… | Acceptance criteria (Given / When / Then) | Story points | Priority | Status |
|---|---|---|---|---|---|---|---|---|
| US-01 | Account self-service | customer | to reset my password by email | I can log in without calling support | Given I request a reset, when I open the link within 1 hour, then I can set a new password | 5 | High | Not started |
| US-02 | Account self-service | customer | to download my invoices | I can send them to my accountant | Given I am logged in, when I click Download, then a PDF of the invoice is saved | 3 | Medium | Not started |
| US-03 | Support tools | support agent | to see a customer's last login | I can troubleshoot faster | Given I open a customer record, then the last login time is shown | 2 | Low | Not started |
