Risk Register Template · Beginner version

A risk register template records each project risk with its probability, impact, score, owner and response plan, so you can prioritise and act before risks become issues.

Risk register · Score = probability x impact; 15-25 high, 8-14 medium, 1-7 low

ID	Risk (cause → event → effect)	Probability (1-5)	Impact (1-5)	Score	Owner	Status
R1	Supplier capacity is limited, so hardware may arrive late, delaying installation	3	4	12	Procurement	In progress
R2	Key developer may leave, causing loss of knowledge and delay	2	4	8	Tech lead	In progress
R3	New regulation may require extra data controls, increasing scope	2	3	6	PM	Not started
R4	Exchange-rate changes may raise licence costs	3	2	6	Finance	Done
