Skills Matrix Template · Expert version

A skills matrix template maps the skills your team needs against each person's proficiency, so you can see strengths, single points of failure and training needs at a glance.

How to use this template

1. List the skills your team needs as column headers.
2. Add team members and rate each skill from 0 to 4.
3. Look at the team averages to find weak skills.
4. Flag skills only one person has: they are a risk.
5. Plan training or hiring and record it in a training plan.

Tips

- Agree what each rating means.
- Let people self-assess, then calibrate with managers.
- Use colour scales for a heatmap.
- Update the matrix twice a year.

Skills matrix · 0 = none, 1 = learning, 2 = can do with help, 3 = independent, 4 = can teach others

Team member	Role	Scheduling	Risk management	Stakeholder mgmt	Agile / Scrum	Budgeting	Data / reporting	Average
Ana	PM	4	3	4	2	3	2	3
Ben	PM	3	2	3	4	2	3	2.83
Chen	Analyst	2	2	2	3	1	4	2.33
Dana	Coordinator	3	1	2	2	2	3	2.17
Team average		3	2	2.75	2.75	2	3
