Kanban Board Template · Expert version

A Kanban board template visualises work as cards moving through columns, with work-in-progress limits that keep flow smooth. This version includes a board view and a card list with dates for tracking cycle time.

How to use this template

1. Rename the columns to match your workflow and set a WIP limit for each.
2. Add work items as cards in the Backlog column.
3. Pull cards to the right only when there is capacity under the WIP limit.
4. Record start and finish dates on the Cards tab to measure cycle time.
5. Review the board daily and improve the process regularly.

Tips

- Lower WIP limits until work flows smoothly.
- Make blocked work visible.
- Use classes of service for urgent work.
- See our Kanban boards guide for more.
