Business Requirements Document (BRD) Template · Advanced version

A business requirements document template helps you capture what the business needs from a project, why, and how you will know it is met, so the solution is built to the right requirements first time.

BRD overview · Business requirements document (BRD)

Section	Guidance	Your content
Project name and owner		
Executive summary	The need and the proposed outcome in brief.	
Business objectives	Measurable goals the project supports.	
Background / current state	How things work today and the problems.	
Scope	In scope and out of scope.	
Stakeholders	Who is affected and who approves.	
Assumptions and constraints		
Requirements	See Requirements tab.	
Success measures	How you will judge success.	
Sign-off	Names, roles and dates.	

Requirements · Each requirement is testable and traceable
