Change Request Template · Expert version

A change request template captures a proposed change to scope, schedule or budget, its impact and the decision, so changes are controlled rather than creeping in unnoticed.

How to use this template

1. Complete the form for each proposed change.
2. Assess the impact on scope, time, cost, quality and risk.
3. Log it in the change log and present it to the approver or change control board.
4. Record the decision, approver and date.
5. Update the plan, baseline and stakeholders when a change is approved.

Tips

- No change is too small to log.
- Agree approval thresholds in advance.
- Consider the combined impact of many small changes.
- See change control for the full process.

Dashboard (sample data)

Field	Value	Count
Priority	High	1
Priority	Medium	1
Priority	Low	1
Decision	Pending	0
Decision	Approved	2
Decision	Rejected	0
Decision	Deferred	1

Change log · Log every change request and its decision

CR #	Date raised	Raised by	Change description	Reason	Impact: scope	Impact: time (days)	Impact: cost ($)	Priority	Decision	Approved by	Decision date
