Project Deliverables Template · Expert version

A project deliverables template lists every output the project must produce, with an owner, due date, acceptance criteria and approver, so everyone agrees what 'done' means.

How to use this template

1. List deliverables from the project scope and work breakdown structure.
2. Describe each in one line and mark it internal or external.
3. Assign an owner and a due date.
4. Write clear, testable acceptance criteria and name the approver.
5. Track status and record approval dates as deliverables are accepted.

Tips

- Deliverables are nouns: things you can hand over.
- Agree acceptance criteria up front to avoid disputes.
- Link each deliverable to a milestone.
- Keep evidence of sign-off.

Dashboard (sample data)

Field	Value	Count
Type	Internal	2
Type	External	2
Owner	BA	1
Owner	Design lead	1
Owner	Tech lead	1
Owner	Trainer	1
Status	Not started	2
Status	In progress	1
Status	On hold	0
Status	Blocked	0
Status	Done	1

Deliverables · Agree acceptance criteria before work starts

ID	Deliverable	Description	Type	Owner	Due date	Acceptance criteria	Approver	Status
