Training Plan Template · Expert version

A training plan template organises who needs to learn what, how, by when and at what cost, so employee development is planned, budgeted and tracked rather than ad hoc.

How to use this template

1. Identify skills gaps using a skills matrix or reviews.
2. Choose training activities and methods for each gap.
3. Schedule dates and estimate costs.
4. Assign an owner and track completion.
5. Check whether skills improved and update the plan.

Tips

- Link training to business goals.
- Mix formal courses with on-the-job learning.
- Budget time as well as money.
- See our guide to PMP certification for PM training.

Dashboard (sample data)

Field	Value	Count
Owner	HR	1
Owner	Manager	1
Owner	PMO lead	1
Owner	Trainer	1
Status	Not started	3
Status	In progress	1
Status	On hold	0
Status	Blocked	0
Status	Done	0

Training plan · Plan, budget and track learning

Employee / group	Role	Skill or goal	Training activity	Method	Start	End	Cost ($)	Owner	Status
