# Project Cost Estimate Template · Beginner version

A project cost estimate template builds up the cost of a project from labour, materials, equipment and other costs by task or work package, then adds contingency to give a realistic budget.

## Cost estimate · Quantity x rate; contingency and total calculate automatically

| WBS / task | Description | Quantity | Rate ($) | Cost ($) |
|---|---|---|---|---|
| 1.1 | Project management | 20 | 650 | 13,000 |
| 1.2 | Requirements | 10 | 550 | 5,500 |
| 1.3 | Development | 60 | 600 | 36,000 |
| 1.4 | Cloud hosting (year 1) | 12 | 400 | 4,800 |
| 1.5 | Testing | 15 | 500 | 7,500 |
| | Subtotal | | | 66,800 |
| | Contingency (10%) | | | 6,680 |
| | Total estimate | | | 73,480 |
