Action Plan Template · Expert version

An action plan template turns a goal into specific actions with owners, deadlines, resources and measures, so everyone knows what to do next and progress is easy to track.

How to use this template

1. Write the goal at the top in one measurable sentence.
2. List the actions needed to reach it, starting with a verb.
3. Assign one owner, a start date and a due date to each action.
4. Note resources and how you will know each action is done.
5. Set priority and review status weekly until the goal is met.

Tips

- Keep actions small enough to finish in a few weeks.
- One owner per action, even if many help.
- Review the plan in a regular meeting.
- Close or replace actions that no longer help the goal.
