Sprint Planning Template · Expert version

A sprint planning template helps a Scrum Team agree a Sprint Goal, check capacity, select Product Backlog items and plan the first tasks, all in one view the team can use throughout the Sprint.

How to use this template

1. Fill in the Capacity tab: available days per person and a realistic focus factor.
2. Agree the Sprint Goal with the Product Owner.
3. Select the top Product Backlog items that support the goal and fit the team's capacity and recent velocity.
4. Break each item into tasks and confirm acceptance criteria.
5. Use the Status column during the Sprint and review it at the Sprint Review.

Tips

- Plan to about 80% of capacity to leave room for the unexpected.
- One clear Sprint Goal beats a list of unrelated items.
- Bring refined items to planning; see backlog refinement.
- Time-box planning to 8 hours for a one-month Sprint.

Dashboard (sample data)

Field	Value	Count
Owner	Ana	1
Owner	Ben	1
Owner	Chen	1
Owner	Dana	1
Status	Not started	4
Status	In progress	0
Status	On hold	0
Status	Blocked	0
Status	Done	0

Sprint plan · Sprint Goal: customers can manage their account without calling support

Backlog item	User story / description	Story points	Owner	Tasks	Acceptance criteria	Status
PB-101	As a customer, I can reset my password by email	5	Ana	API endpoint; email template; tests	Reset link expires after 1 hour	Not started
PB-102	As a customer, I can download invoices as PDF	3	Ben	PDF service; download button	PDF matches invoice data	Not started
PB-103	As support, I can see a customer's last login	2	Chen	Admin view field; audit log	Shows date and time in local zone	Not started
PB-104	Spike: evaluate search library	3	Dana	Prototype two libraries	Recommendation documented	Not started
Total		13				

Capacity · Check capacity before committing to the Sprint Backlog

Team member	Available days	Focus factor	Capacity (days)	Notes
Ana	9	0.80	7.20	1 day leave
Ben	10	0.80	8	
Chen	8	0.70	5.60	Support rota
Dana	10	0.80	8	
Team total	37		28.80
