Agile Release Plan Template · Expert version

An agile release plan template maps features to upcoming releases and Sprints using your team's velocity, so you can forecast what will ship when and manage stakeholder expectations.

How to use this template

1. List the features or epics for each release with estimates.
2. Set your average velocity; capacity accumulates by Sprint.
3. Check cumulative points against forecast capacity: 'No' means the scope will not fit.
4. Adjust scope or dates and agree the plan with stakeholders.
5. Update after every Sprint Review.

Tips

- Use a range of velocities for honest forecasts.
- Put the most valuable features first.
- For SAFe, use it as a simple PI planning worksheet.
- Keep release goals visible.

Release plan · Forecast capacity assumes a velocity of 30 points per Sprint: change it to yours

Release	Target date	Sprint	Feature / epic	Story points	Cumulative points	Forecast capacity	On track?	Risks / notes
R1	30 Apr 2026	S1	Password reset	13	13	30	Yes	
R1	30 Apr 2026	S2	Invoice downloads	18	31	60	Yes	
R1	30 Apr 2026	S3	Admin exports	21	52	90	Yes	Depends on API
R2	30 Jun 2026	S4	Help centre	25	77	120	Yes	
R2	30 Jun 2026	S5	Notifications	30	107	150	Yes	New team member
