Gap Analysis Template · Expert version

A gap analysis template compares where you are with where you want to be, scores the size of each gap and turns it into actions, so improvement work focuses on what matters most.

How to use this template

1. Choose the areas to assess.
2. Describe the current state honestly and the desired future state clearly.
3. Score both from 1 to 5; the gap calculates automatically.
4. Plan actions to close the largest gaps, with owners and dates.
5. Prioritise and track the actions as a project.

Tips

- Use evidence, not opinions, for current state.
- Close a few big gaps rather than many small ones.
- Re-score after six months.
- Feed actions into an action plan.

Dashboard (sample data)

Field	Value	Count
Owner	Analyst	1
Owner	HR	1
Owner	PMO	2
Priority	High	2
Priority	Medium	2
Priority	Low	0

Gap analysis · Gap = target score − current score

Area	Current state	Desired future state	Current (1-5)	Target (1-5)	Gap	Actions to close the gap	Owner	Due date	Priority
Project planning	Plans in personal spreadsheets	Standard plans in one tool	2	4	2	Roll out a work management tool and templates	PMO	30 Jun 2026	High
Risk management	Risks rarely recorded	Live risk register on every project	1	4	3	Introduce risk register and monthly review	PMO	31 May 2026	High
Reporting	Monthly manual reports	Weekly automated dashboards	2	4	2	Build dashboard from tracker data	Analyst	31 Jul 2026	Medium
Skills	Few certified PMs	All PMs trained in core methods	2	3	1	Training plan and certification budget	HR	30 Sep 2026	Medium
