# Project Proposal Template · Beginner version

A project proposal template helps you win approval for a project by setting out the problem, your proposed solution, the objectives, scope, timeline, budget and risks in a clear, persuasive structure.

## Proposal · Write the summary last

| Section | What to write | Your content |
|---|---|---|
| Title and summary | One paragraph: the problem, your solution and the ask. | |
| Background / problem | What is wrong today and the evidence. | |
| Proposed solution | What you will do and why this approach. | |
| Objectives | Measurable outcomes (SMART). | |
| Scope | In scope and out of scope. | |
| Deliverables | What will be produced. | |
| Approach and timeline | Phases and key milestones (see Budget & timeline tab). | |
| Budget | Total cost and main cost lines. | |
| Benefits | Financial and non-financial benefits; ROI if known. | |
| Risks | Top risks and how you will manage them. | |
| Team | Who will deliver and their roles. | |
| Next steps / approval | Decision needed, by whom and by when. | |
