Workflow Template · Expert version

A workflow template maps a business process step by step: who does what, with which inputs and tools, what they hand over and how long it takes. It is the first step to standardising or improving a process.

How to use this template

1. Pick one process and define where it starts and ends.
2. List each step in order with its owner, inputs and outputs.
3. Record tools, handoffs, time and approvals.
4. Note pain points, delays and rework.
5. Redesign the workflow: remove steps, automate handoffs, and agree the new process with the team.

Tips

- Map the process as it really works, not as documented.
- Count handoffs: each one adds delay.
- Use a swimlane diagram to visualise roles.
- Automate repeatable steps in your work management tool.

Dashboard (sample data)

Field	Value	Count
Owner / role	Coordinator	2
Owner / role	Reviewer	1
Owner / role	Specialist	1
Owner / role	Team lead	1

Workflow · Map the current process, then redesign it

Step	Activity	Owner / role	Input	Output	Tool	Hand off to	Time (hours)	Approval needed?	Pain points
1	Receive request	Coordinator	Request form	Logged request	Wrike	Team lead	0.25	No	
2	Assess and prioritise	Team lead	Logged request	Priority and owner	Wrike	Specialist	0.50	No	Requests missing details
3	Do the work	Specialist	Brief	Draft	Design tools	Reviewer	6	No	
4	Review	Reviewer	Draft	Feedback or approval	Proofing tool	Specialist / requester	1	Yes	Feedback scattered across email
5	Deliver and close	Coordinator	Approved output	Delivered output	Wrike	Requester	0.25	No
