Product Roadmap Template · Expert version

A product roadmap template shows where a product is heading: themes and initiatives laid out by quarter, linked to goals, with owners and status, so teams and stakeholders share one view of priorities.

How to use this template

1. Start from product goals or OKRs, then group work into a few themes.
2. Add initiatives under each theme and the outcome each should achieve.
3. Shade the quarters when each initiative is planned.
4. Assign owners and a confidence level; lower confidence further out is normal.
5. Review the roadmap monthly and share it with stakeholders.

Tips

- Focus on outcomes, not feature lists.
- Avoid exact dates beyond the next quarter.
- Keep a separate release plan for delivery detail.
- Use it as a technology or IT roadmap by changing the themes.

Dashboard (sample data)

Field	Value	Count
Owner	Engineering	2
Owner	Partnerships	1
Owner	Product	2
Status	Not started	3
Status	In progress	2
Status	On hold	0
Status	Blocked	0
Status	Done	0

Roadmap · Now, next, later: shade the quarters each initiative runs

Theme	Initiative	Goal / outcome	Q1	Q2	Q3	Q4	Owner	Confidence	Status
Self-service	Customer portal	Cut support calls 30%	■	■			Product	High	In progress
Self-service	In-app help centre	Raise CSAT to 8.5		■	■		Product	Medium	Not started
Growth	Partner integrations	20 new partners			■	■	Partnerships	Medium	Not started
Platform	Move to cloud hosting	99.9% uptime	■	■	■		Engineering	High	In progress
Platform	Single sign-on	Enterprise readiness				■	Engineering	Low	Not started
