User Story Template · Expert version

A user story template helps you write requirements from the user's point of view, 'As a… I want… so that…', with clear acceptance criteria, so teams build what users actually need.

How to use this template

1. Identify the user role and write the story as As a… I want… so that….
2. Add acceptance criteria, ideally in Given/When/Then form.
3. Group stories under epics on the Epics tab.
4. Estimate with the team in story points and set priority.
5. Split stories that are too large to finish in one Sprint.

Tips

- Write from the user's view, not the system's.
- Keep the 'so that' clause: it explains value.
- Use INVEST to check quality.
- See epics vs stories vs tasks.

Dashboard (sample data)

Field	Value	Count
Priority	High	1
Priority	Medium	1
Priority	Low	1
Status	Not started	3
Status	In progress	0
Status	On hold	0
Status	Blocked	0
Status	Done	0

User stories · Write stories that are Independent, Negotiable, Valuable, Estimable, Small and Testable (INVEST)

ID	Epic	As a…	I want…	So that…	Acceptance criteria (Given / When / Then)	Story points	Priority	Status
US-01	Account self-service	customer	to reset my password by email	I can log in without calling support	Given I request a reset, when I open the link within 1 hour, then I can set a new password	5	High	Not started
US-02	Account self-service	customer	to download my invoices	I can send them to my accountant	Given I am logged in, when I click Download, then a PDF of the invoice is saved	3	Medium	Not started
US-03	Support tools	support agent	to see a customer's last login	I can troubleshoot faster	Given I open a customer record, then the last login time is shown	2	Low	Not started

Epics · Group related stories into epics

Epic	Description	Goal	Stories	Owner	Status
Account self-service	Let customers manage their accounts online	Cut support calls 30%	US-01, US-02	Product Owner	In progress
Support tools	Give agents better customer context	Reduce handling time	US-03	Product Owner	Not started
