Project Tracker Template · Expert version

A project tracker template keeps every task and project in one list with owners, deadlines, priority, status and progress, so you can see what is on track, what is late and what needs attention.

How to use this template

1. Add one row per task, grouped by project.
2. Set an owner, priority, start and due date.
3. Update status and % complete at least weekly.
4. Use filters to view one project, one owner or overdue work (negative Days left).
5. Review blocked items in your team meeting and record decisions in Notes.

Tips

- Keep task names short and action-based.
- Agree status definitions with the team.
- Archive completed rows monthly.
- When the list grows large, move to project management software.
