Lessons Learned Template · Advanced version

A lessons learned template captures what went well, what didn't and why, and turns it into recommendations with owners, so future projects repeat successes and avoid the same mistakes.

Lessons learned · Capture lessons during the project, not only at the end

#	Phase / area	What happened	Went well or needs improvement?	Root cause	Impact	Recommendation	Owner	Action status
1	Planning	Requirements signed off two weeks early	Went well	Product owner available daily	Medium	Secure product owner time in the charter	PMO	Done
2	Build	Test environment unavailable for 5 days	Needs improvement	No environment booking process	High	Book environments at planning; add health checks	Ops lead	In progress
3	Communication	Stakeholders unclear on go-live date	Needs improvement	Date changed without update	Medium	Publish dates in a single dashboard	PM	Not started
