Sprint Retrospective Template · Expert version

A sprint retrospective template gives your team a simple structure to reflect on the last Sprint: what went well, what didn't, what to try, and the improvement actions you will take next.

How to use this template

1. Set the stage: remind everyone of the Sprint Goal and keep it blameless.
2. Gather observations under Went well, To improve and Ideas.
3. Vote on the most important items.
4. Discuss root causes and agree one to three actions with owners on the Action items tab.
5. Start the next retrospective by reviewing last Sprint's actions.

Tips

- Change the format occasionally; see retrospective games.
- Limit actions so they actually happen.
- Add improvement actions to the next Sprint Backlog.
- Celebrate wins as well as fixing problems.

Dashboard (sample data)

Field	Value	Count
Category	Went well	2
Category	To improve	2
Category	Ideas	1
Category	Shout-outs	1

Retrospective · Sprint 14 · 3-16 March

Category	Observation	Votes	Discussion notes
Went well	Daily Scrums finished on time	3	
Went well	Pairing on the payments story	4	
To improve	Stories arrived in planning without acceptance criteria	6	Refine earlier
To improve	Build pipeline failed twice	5	
Ideas	Try a mid-Sprint refinement session	4	
Shout-outs	Thanks to Chen for fixing the test data	2	

Action items · Pick one to three improvements; review them next retrospective

Action	Owner	Due	Success measure	Status
Hold a 1-hour refinement session mid-Sprint	Product Owner	25 Mar 2026	All top-10 items have acceptance criteria	Not started
Add pipeline health alert to team channel	Ben	20 Mar 2026	Failures noticed within 10 minutes	Not started
