Project Brief Template · Expert version

A project brief template gives everyone a one-page project overview: the background, goals, audience, deliverables, timeline, budget and team. It is lighter than a charter and ideal for kicking off work quickly.

How to use this template

1. Fill in the background and goal first; everything else follows from them.
2. Describe the audience and key messages in plain language.
3. List deliverables, dates and budget.
4. Name the team and the person who approves the work.
5. Share the brief at kick-off and keep it linked from your project plan.

Tips

- Keep it to one page.
- Use measurable success metrics.
- Write for someone new to the project.
- Update it if goals change.

Project brief · A one-page overview to align the team

Section	Prompt	Your answer
Project title		Spring product launch
Background	What prompted the project?	New feature set ready for release in Q2.
Goal	What does success look like?	500 trial sign-ups in the first month.
Audience	Who is it for?	Existing customers and operations managers.
Deliverables	What will be produced?	Landing page, email series, webinar, sales deck.
Key messages	What must people understand?	
Timeline	Key dates and deadlines.	Kick-off 1 Mar; launch 15 Apr.
Budget	Approved spend.	$20,000
Team and roles	Who is involved and who decides?	
Constraints	Limits on time, money, brand or tools.	
Success metrics	How you will measure results.	Sign-ups, demo requests, conversion rate.
Approvals	Who signs off and when.
