Meeting Notes Template · Expert version

A meeting notes template captures what matters from a meeting: who attended, the key points, the decisions made and the action items with owners and due dates.

How to use this template

1. Fill in the meeting name, date, attendees and apologies.
2. For each agenda item, note key points briefly, not word for word.
3. Record decisions clearly in their own column.
4. Capture every action with one owner and a due date.
5. Send the notes within 24 hours and review actions at the next meeting.

Tips

• Write actions as verbs: 'Send', 'Draft', 'Approve'.
• Separate decisions from discussion.
• Keep notes factual and neutral.
• Track open actions in an action plan.
