Lessons Learned Template · Beginner version

A lessons learned template captures what went well, what didn't and why, and turns it into recommendations with owners, so future projects repeat successes and avoid the same mistakes.

Lessons learned · Capture lessons during the project, not only at the end

Phase / area	What happened	Went well or needs improvement?	Recommendation	Owner
Planning	Requirements signed off two weeks early	Went well	Secure product owner time in the charter	PMO
Build	Test environment unavailable for 5 days	Needs improvement	Book environments at planning; add health checks	Ops lead
Communication	Stakeholders unclear on go-live date	Needs improvement	Publish dates in a single dashboard	PM
